TOPANGA TECHNOLOGIES DEBUTS ADVANCED PLASMA LIGHTING[™] AT INDUSTRY EVENTS NATIONWIDE

Demonstrations of New Plasma Lamps and Engines Will Take Place Throughout 2010

LOS ANGELES, CALIF. – MAY 12, 2010 – An innovator in solid-state-driven plasma lighting, Topanga Technologies has confirmed an aggressive schedule of product demonstrations at key industry events throughout 2010. The list of appearances includes prominent lighting, optics and energy related events where Topanga will introduce its highly anticipated plasma lamps and engines to influential organizations around the nation.

"Our unique IP position offers a number of distinct advantages over currently available plasma lamps," said Greg R. Barry, CEO of Topanga. "The presentation of our technology this year is timely, given the industry's fast-paced move toward improved energy efficiency and reliability."

Topanga will debut its Advanced Plasma Lighting through demonstrations to a select audience at the world's largest industry event, Lightfair International 2010, May 12-14 in Las Vegas, NV. On May 18, Topanga's Co-Founder Mehran Matloubian will present the first public display of the company's Advanced Plasma Lighting product at the San Diego Gas & Electric (Sempra) Annual Technology Showcase in San Diego, CA.

The OIDA 3rd Annual Green Photonics Innovation Forum in Santa Clara, CA on June 16 will feature a presentation of Topanga's APL as a viable solid-state lighting alternative. Subsequently, Topanga will offer table-top demonstrations focused on plasma applications and functionality at PG&E's Pacific Energy Center in San Francisco, CA on June 17.

ABOUT TOPANGA TECHNOLOGIES

For industrial and commercial lighting, Topanga Technologies is the leading innovator of solid-state drivers and electrode-free plasma lamps, providing energy efficient, economical and reliable lighting solutions that surpass both traditional and new technology platforms. Founded in 2005, Topanga Technologies has headquarters in Los Angeles, CA. For more information, visit www.topangatech.com.
